DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed March 3, 2006 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but not all the information referred to therein has not been considered. Copy(ies) of references 5 and/or 6 was/were not received.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A method claim must set forth a series of method steps.

Art Unit: 3748

4. Claims 2-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Improper to depend apparatus claims from an independent method claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1-2, 4 and 6-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ranasinghe et al. Ranasinghe et al. teaches a multi-component working fluid containing ammonia and water; a feedpump 12, a heat exchanger HVRG using a fluid that supplies heat to the working fluid arranged in counter-flow to the working fluid, a turbine 24, a heat exchanger 26 using a fluid that absorbs heat from the working fluid arranged in counter-flow to the working fluid, and means to sealably interconnect the equipment with flow passages, and valves, sensors and control systems to manage the operation.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 3 and 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ranasinghe et al. Obvious design modification(s).

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
